

TarryGels™

TarryGels are soft gel filled pillows designed to provide a comfortable cushion to meet the support needs of micro-preemie, preemie, and full-term infants. These pillows can help reduce the need for frequent re-positioning or to make immobilized babies more comfortable. Each TarryGel comes with a fully washable, attractive, flame retardant cover. The covers are also available for purchase separately.

- Made from soft, DEHP-free polyethylene film that does not react with the gel fill. Film also prevents the gel from evaporating
- Pillow covers are a flame retardant polyester blend material that can be washed and reused
- Gel is a non-toxic, water based food gel designed to be resistant to bacterial and fungal growth
- Single Patient, Hospital Use Only
- Not made with Natural Rubber Latex (latex-free)
- Made in U.S.A
