

TS-205

Black Eye™

Endoscopic **Marker**

**Indication for use**

Black Eye is indicated for endoscopically marking lesions in the GI tract permanently.

Black Eye's biocompatible, non-toxic formulation contains no harmful ingredient. Black Eye consists of medical grade carbon black which lasts for more than 10 years in the body!

**Permanent Ink**

Poor emulsion can choke the tube of the syringe or body fluid!

**Stable Emulsion**

**Stable Suspension**

Poor suspension can make the solution separated, which leads to unstable marking!

**Proven in 45 countries**

**THE  
STANDARD**

# Black Eye™

# Endoscopic Marker

## STORAGE

Store the product at room temperature.

## SHELF LIFE

24 months.

## PHYSICAL PROPERTIES

- 1) Color: Black
- 2) Density: 1.04g/mL
- 3) Boiling Point: 97°C (207°F)
- 4) Freezing Point: -0.5°C (33°F)

## STERILIZATION

- 1) Aseptic filling
- 2) Sterility Assurance Level (SAL):  $10^{-6}$

## RAW MATERIALS

Water for injection  
Glycerin  
Carbon Black

## DIRECTIONS FOR USE

A 25 gauge sclerotherapy needle with a needle length of 4mm or less is recommended for this procedure.

## IMPORTANT

When the needle is properly positioned, insert the tip 30°-45° tangentially into the submucosal space of the colon.

## CAUTION

Inject 0.5-0.75 ml of the marker into each injection site. This volume typically produces a mark on the colon measuring 1-2 cm in diameter. The maximum recommended dose is 8ml per patient.

## 5ml syringe, box of 12

- Rectangular canister for secure and compact storage
- Oval tube with angles for preventing the tubes from rolling around
- Clear tube labels allowing for full visualization of the syringe
