# Black Eye

ENDOSCOPIC MARKER

## Keep an on that lesion

Black Eye™ is indicated for permanently marking lesions in the GI tract.

### **“NO SHAKE” NECESSARY! = EASIER, FASTER, SAFER!**

Black Eye™ proprietary formula provides stable Emulsion and Suspension. It is more viscous and does not migrate like other Tattoo Products; resulting in consistently dark, permanent marks.

### **SAFE**

USED IN OVER 50 COUNTRIES SINCE 2013.  
Blister packaging acts as a barrier and protects against cross-contamination.

### **PERMANENT**

Black Eye™ leaves a permanent mark, as carbon black is a stable and safe pigment. Resulting in a **“Lifetime of Surveillance”**.

Reimbursable  
CPT Code  
**45381**

Black Eye Features	Black Eye Benefits
Only “No Shake Tattoo Marker”	Easier, Faster, Safer
Stable Emulsion	Does NOT Migrate
Blister Pack	Reduces Risk of Cross Contamination
